Profile

Graduated from Amirkabir University of Technology with a degree in Computer Engineering. A full-stack developer with over 4 years of experience, skilled in building web applications from the ground up. Proficient in agile methodologies and comfortable working in fast-paced environments.

Work Experience

Full stack developer

Feb 2021 - Oct 2021

Puzzle studio

Puzzle Studio is a company that provides live stream server solutions and web development services for its customers. I am responsible for maintaining their live stream servers as well as developing websites for their clients.

Freelancing

Oct 2021 - Feb 2024

Remote

Freelancing as a full-stack developer for major organizations such as WHO, WVSSM, Odyssey, Hadaf School, Baham Store and POD

Front-end Team Lead

Feb 2024 - Aug 2024

Goldiran Asayesh

Goldiran Asayesh is a company that provides insurance services. I am responsible for leading a team of three front-end developers to create a new website for the company and manage existing websites, such as 🌐 Goldiran Asayesh 🌐 Kardoona 🌐 Inzi(Not completed). Additionally, I handle DevOps tasks, including CI/CD, Docker, and web server management.

Projects

LandoLet 🌐

May 2022 - June 2022

Odyssey

LandoLet is a mobile app for renting an apartment in uk, I'm using Django-DRF to develop the back end of this mobile app

Inventory and gap analysis system 🌐

June 2022 - Dec 2022

Full stack Developer

The inventory system is a system for managing items and facilities that WHO gave to countries. I am designing a full website and mobile app for this app using ReactJS and Django this project is deployed in many countries as Ukraine, Timor-Leste and ...

POD app 🌐

Aug 2023 - present

Full stack Developer

Pod App is a petroleum marketplace where users can buy and sell petroleum products. I am responsible for developing both the website and the admin Panel app for this project using ReactJS and Django. The app is currently still under development.

Baham Store 🌐

May 2024 - Sep 2024

Back end developer

Baham Store is an online platform that offers a wide range of products. I am responsible for developing the back-end of the website using Django and Django Rest Framework (DRF). Additionally, I handle DevOps tasks and manage the mail server development.
